

## VOLUNTEERS NEEDED

We are looking for volunteers to help us with our research on ROSACEA.

Do you suffer from any of the following?

- Frequent flushing or permanent redness on the cheeks, nose chin or forehead
- Small visible broken blood vessels on the face
- Small bumps or pimples on the face

If you can answer yes to any of the above and are over the age of 18 you are eligible in participating in our research program running from August until November 2006.

We would require an eyelid swab and a small incision of a pustule to be taken from the face.

Your participation in this research program would help us begin to understand a disease that affects million of Australians.
